SENATOR JOHNSON SCORES AGREEMENT OF AMBASSADOR MORRIS WITH JAPAN

WASHINGTON, January 29—"An agreement between Ambassador Morris and Ambassador Shidihara of Japan has created a situation that 'is intolerable to the people of California' Senator Hiram Johnson of California declared today in the Senate. While Johnson spoke on the proposition Secretary of State Colby was conferring with President Wilson in the White House for the first time since the Secretary left for South America about six weeks ago. It was said that the Morris-Shidihara agreement would be discussed during the conference.

PRELIMINARY REPORTS SHOW JAP SENTRY GUILTY KILLING U. S. OFFICER

TOKIO, January 28 (Delayed)—The Japanese sentry who shot and killed Lieut. W. H. Langdon, U. S. N. at Vladivostok three weeks ago has been adjudged guilty in a report of the preliminary inquiry filed with the court martial in chief according to a Vladivostok dispatch to the newspaper Ji Ji Shimpō.

UNIONTOWN, January 29—A sentence of from 48 to 85 years in prison was imposed on Albert Smith, aged 19, here today after he pleaded guilty to charges of arson. Smith is alleged to have fired many buildings in Fayette County and surrounding territory. Residents were in a state of terror as blaze after blaze broke out in isolated sections. Smith is alleged to have made a confession but later retracted it. Today he pleaded guilty. He was sentenced to ten years each for four charges of felonious arson and two to five years for nine charges of plain arson.

FOUR KILLED BY EXPLODING BOILER OF ENGINE ON THE B. & O. RAILROAD

WHEELING, W. Va., January 29—Four men were killed when the boiler of an engine on the Wheeling division of the B. & O. blew up from an unknown cause at Floyd near here today. The dead are: M. J. Walsh, road foreman of Wheeling, O. J. Carpenter of Machen, W. Va., O. H. Wilford, fireman of Holly Grove, W. Va. and O. E. Grogan, brakeman of Wheeling. The train was en route from this city to Bentwood, W. Va.

BERGDOLL AND STECHER ISSUE STATE- MENT OF INSULT TO ALL AMERICANS

BERLIN, January 29—Grover Bergdoll, American draftsman and his chauffeur Isaac Stecher who recently fled from the United States today issued the following statement: "We intend to return to America if America needs us and when there are honest men at the head of the American government."

CHURCH DYNAMITED WHILE PRAYER MEETING WAS IN PROGRESS AT NIGHT

WILKES BARRE, January 29—While prayer meeting was in progress last night the United Evangelical church in Slocum township this county was wrecked by an explosion of dynamite. About 50 persons were in the church at the time but none were seriously injured. The state police believe it was caused by boys who had been warned from playing around the church property.

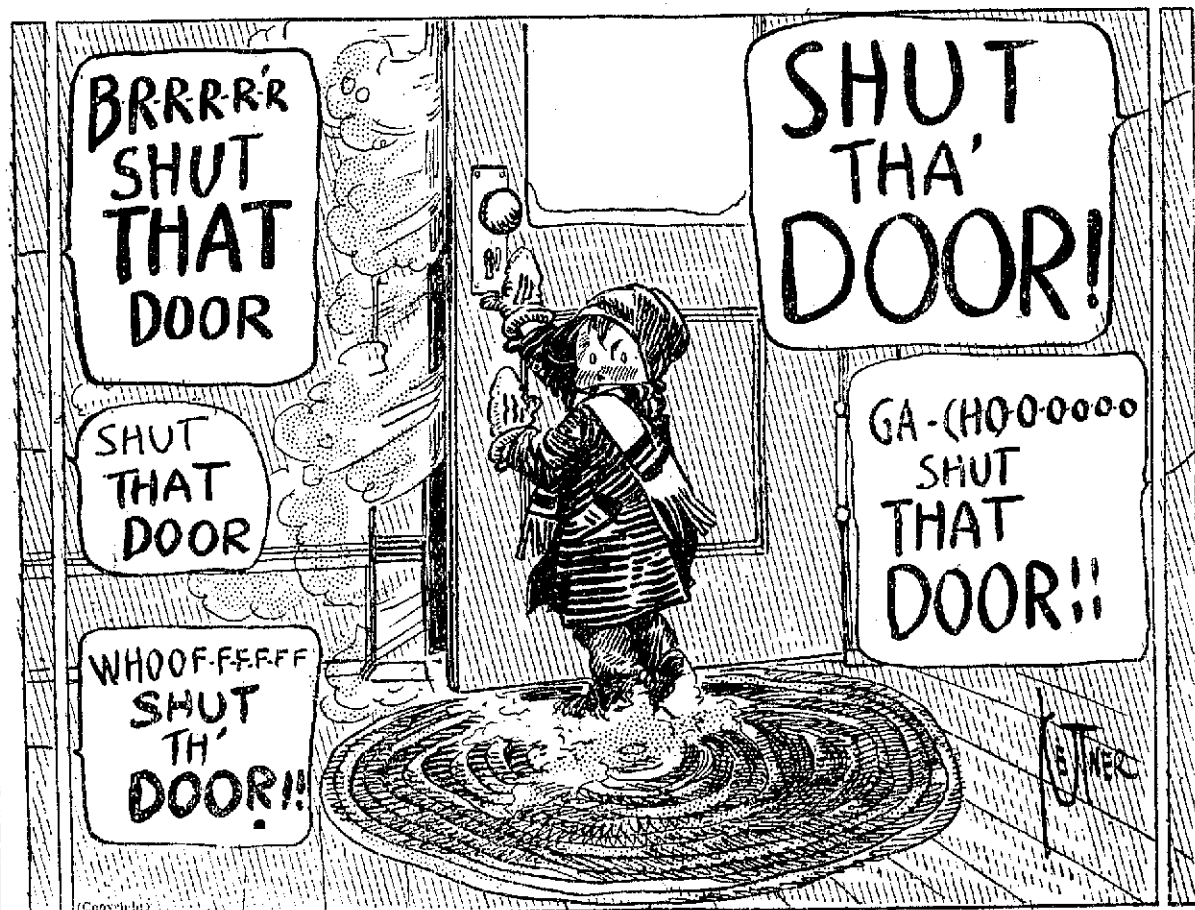

PHILADELPHIA JUDGE FREES BRINES SAYING EVIDENCE NOT SUFFICIENT

PHILADELPHIA, January 28—William Brines was acquitted today of the charge of killing Elmer Drews. The University of Pennsylvania sophomore was freed on the ground that insufficient evidence had been submitted to connect him with the Dartmouth College senior's death.

Judge Ferguson of the criminal court, before whom the case was tried, in his charge to the jury, pointed out that no evidence had been submitted to prove that Brines met Drews on the day of his death and that the evidence submitted against the defendant was circumstantial.

He directed the jury to bring in a verdict of not guilty on the bill charging murder, and upon the manslaughter bill as well. The jury immediately returned the verdict without leaving the box. The foreman said it had been unanimously decided by the jury last night at the close of the prosecution to acquit Brines.

Greetings and Salutations

PARIS, January 29—The amount of the German reparation to the Allies will be announced at 6 o'clock this evening it was announced by the Supreme Council today.

HENRY STEPHENS OF CARLISLE SUFFERS SLEEPING SICKNESS

Prof. Henry M. Stephens, of the faculty of Dickinson College, is very ill at his home on South College street, Carlisle, with what his physicians believe to be sleeping sickness. Prof. Stephens, who is head of the department of biology at the college, took ill Monday a week. He met one of his classes on that day in his home but later was forced to take to his bed.

Dr. Rickenbaugh, of Carlisle, the attending physician, called in for consultation two Harrisburg physicians, Dr. Charles Rebeck and Dr. J. B. McAllister, and they agreed that the case was one of sleeping sickness.

Sleeping sickness is a disease of the nervous system which has appeared at many cities throughout the country during the past two years. The germ has never been isolated. It takes from several weeks to a number of weeks for the disease to run its course. It is not contagious and there is no quarantine.

It was stated today that the patient is doing as well as can be expected. Prof. Stephens' father died Sunday afternoon at an advanced age.

WEST VIRGINIA MURDER TRIAL JURY NEARS COMPLETION

Williamson, W. Va., Jan. 22—Completion of the jury is probable tonight in the trial of Sid Hatfield and 22 others for the slaying of 7 detectives at Matthews last May. Approximately 80 men have been excused from jury service. Most of them being automatically disqualified by the ruling of Judge Bailey that no one connected with the United Mine Workers of America or with the coal operators is eligible for jury duty. More than half of the jurors examined yesterday were related to one or more of the defendants.

NOON STOCKS

New York—Closing prices on the stock exchange today were: American Locomotive, 83; American Steel Foundry, 30 1/8; American Woolen, 67; Anaconda, 39 1/4; Baldwin Locomotive, 89 7/8; Bethlehem Steel, 55 1/4; Bethlehem Steel B, 57 3/8; Central Leather, 41; Crucible Steel, 95; Erie, 13 1/2, preferred, 19 7/8; General Electric, 123 1/4; General Motors, 15; Maxwell, 5 3/4; Middle States Oil, 13 1/2; Midvale, 31 1/2; Okla. Producers, 3 5/8; Penna., 41 3/4; Pittsburgh Coal, 61; Reading, 84; Republic Steel, 67; Sinclair, 24 1/2; U. S. Steel, 83 1/8.

CLEARFIELD TEAM AMERICAN LEGION TRIMS BELLEFONTE

Old Time Stars Quickly Get Back to Form And Centre County Warriors Stood No Chance.

CLARK MITCHELL STARRED

Our American Legion boys went over the top last evening when they defeated the Bellefonte Legionnaires by the score of 37 to 16. The first half ending 15 to 10 with the local five in the lead.

Both teams wore blue jerseys and this similarity caused the veterans to "look for the whites of their eyes" before passing the ball, some what slowing up the floor work in the first period. But with army strategism our boys wisely discarded the blues and donned white jerseys. The resulting teamwork in the second period netted the locals 22 points to the visiting teams 6, allowing the latter but two field goals.

Clark Mitchell played a stellar game for Clearfield, caging 7 field goals and dropping in 6 fouls out of 11 tries.

Way Powell, better known as Dud, contrary to his name was very much alive and started in the second period ringing up three baskets in quick succession.

Wayne Johnson was the pivot man for our team and caged two field goals. Harold Robison played a fast game at guard and found time to drop in a basket. Jimmy Mitchell played a good floor game as did Ted Leitinger, the latter scoring five points.

The Legion band furnished the music for over four hundred people who attended the game. Line-up:

Clfd. A. L. Pos Bellefonte
C. Mitchell F. Schad
Leitinger C. Cruse
Johnson C. Decker
J. Mitchell G. McGinley
Robison G. McClellan

Goals from field-C. Mitchell, 7; Powell, 3; Johnson 2; Leitinger, 1; Robinson, 1; Decker, 2; Schad, 1; Cruse, 1; McGinley, 2. Goals from four-Leitinger, 3 out of 6; C. Mitchell, 6 out of 11; Schad, 2 out of 4; Cruse, 1 out of 3; McGinley, 1 out of 3. Substitutions—Clearfield, Powell for Leitinger, Parren for Schad, Bellefonte, Morrison for Shad. Referee—Walter Flegel. Time keeper—Heisey. Time of periods—20 minutes.

Byron Chaplain, of State College, is visiting his parents Mr. and Mrs. John Chaplain on Nichols street.

Mrs. John Daugherty spent yesterday with friends in Curwensville.

Toledo, O., Jan. 29—President-elect Harding is wearing his last year's overcoat, Paul Gettman, his tailor, reported today. Gettman was interviewed regarding Harding's wardrobe. It had been rumored that he had ordered a large and expensive wardrobe. He said Harding's wardrobe consists of one black inaugural suit, two spring suits and two fall suits. The inaugural suit is of black unfinished worsted plain coat and unbraided. The coat being of the one button, cut away frock variety.

NEW STATE COLLEGE PRESIDENT IS JOHN MARTIN THOMAS

Vermont Man is Elated At Opportunity to Head Big Agricultural School and Will Accept Quickly.

SPARKS IN HISTORY CHAIR

Dr. John Martin Thomas, for 12 years president of Middlebury College, Vermont, who was invited yesterday to become president of Pennsylvania State College, succeeding Dr. Edwin E. Sparks, who resigned last June in a dispatch from New York last night, said that he expects to accept the post. Soon after the invitation was announced Dr. Thomas submitted his resignation at Middlebury.

The selection of Dr. Thomas was made Tuesday at the semi-annual meeting of the board of trustees of State College, and the invitation was extended to him in New York by a member of the board. Judge H. W. Mitchell, of Pittsburgh, its chairman, class of 1890, State College, has been taking care of the executive work of the college since Dr. Sparks' retirement.

Possibilities Irresistible

In his statement from New York Dr. Thomas said:

"As one of the large state institutions of the United States and the land grant college of the commonwealth which is second in agricultural importance, as well as in population and resources, the position offers possibilities which I cannot refuse. I expect to accept."

Dr. Sparks, for 12 years president of State College, will remain as a lecturer on American history.

JEANNETTE POLICE SHOT TO DEATH

Jeannette, Jan. 23—Policeman Jos. Bossard, aged 45, was shot and killed here early today while patrolling his beat on 11th street. James Marshall, a negro and his wife and Chas. Hunter are being held in connection with the shooting. According to the police Marshall came to the police station and said someone shot through the door of his house. The policeman was found later. Marshall's house has been under surveillance by the police for some time.

DISTRICT GOVERNOR ASPINWALL OF WEST VIRGINIA INSTITUTES ROTARY CLUB

Large Delegations of Rotarians Come Here From DuBois, Altoona and Johnstown to See Local Club Get Under Way. Rotary Club a Novel Idea and Has Had a Wonderful Growth.

HAS RECORD FOR DOING MANY WORTHWHILE THINGS

The Clearfield Rotary Club was formally instituted last evening at a meeting held in The Dimeling hotel, which was presided over by President Dr. Ward O. Wilson and attended by Rotarians from DuBois, Altoona and Johnstown.

District Governor the Rev. Richard Aspinall, of Buckingham, West Virginia, conducted the formal institution. Dick Aspinall is one of the best known men in Rotary and added new laurels to his already great reputation as an executive and "after dinner" orator by his work last evening.

Addresses were also made by Dr. Wingert of Altoona; Delos Hibner, of DuBois; Jack Lippart, of Johnstown and A. D. Bigler, of the local club. The latter gentleman was chairman of the entertainment committee and explained that his committee had decided on four of the local members to do the talking for the "home guards." The program allowed but eight minutes for their speeches, which would give each man two minutes, and in order to save time, and for other reasons which we refuse to mention, President Wilson called upon the four designated: Messrs. Kurth, Stewart, Callahan and Connelly, to occupy two minutes jointly by all talking at the same time on subjects assigned them. The four rose to the occasion but Kurtz "raised" his voice above the others and won the hearing.

The new Club starts out with a charter membership of twenty-two.

For the benefit of the uninitiated we publish herewith a brief history of Rotary.

The True Origin of Rotary
Rotary came into being with a group of four men seated around an office table. As it happened each one of the four represented a different calling—one a coal dealer, one a mining operator, one a merchant tailor, and the fourth an attorney. The attorney, Paul P. Harris, was the one who first advanced the idea of forming a club different from any other club then known, and to him belongs the credit for starting the great Rotary movement.

The meeting of the four at which it was decided to organize a club, that now historic meeting of the four original Rotarians, was held February 23d, 1905, in the Unity Building on Dearborn street, Chicago. It was decided to invite to membership just one man from each different business, or professional calling. A printer, a real estate man, an insurance man, and a banker, were the next four admitted.

"Rotary" was chosen as the name of the new club because the members entertained the meetings in "rotation" at their places of business. As "Rotation Club" was somewhat inapt they decided to adopt the shorter form and call it the "Rotary Club."

Every Member an Active Member

The Rotary Club has one rule which must not be violated. This is the rule in regard to attendance. Practically every Rotary club has a clause in its Constitution whereby a member is automatically dropped from membership if he misses four meetings in succession. To this rule is attributed one of the reasons for the remarkable efficiency of Rotary. A careful record of each member's attendance is kept by the secretary and nothing short of sickness or death can excuse a member. Absence from the city is no excuse, for there is a rule whereby a member may attend the meeting of a Rotary Club in any city and receive credit for attendance just as if he had been present at the meeting of his own club.

LABOR COMMITTEE OF RAILROADS HAVE HARD NUT TO CRACK

Chicago, Jan. 22—Means of cutting the wages of the railroad employees were being decided upon by the Labor Committee of the Association of Railroad Executives in session here today. An agreement was reached among the five members of the committee that no drastic action must be taken immediately and that they would remain in session until they had decided what action would be taken. They hoped to make an announcement on Monday as to what steps they had taken. They expect to carry their case to the public by offering a reduction in freight and passenger rates provided they can lower the wage schedule.

SOME SURPRISE

"Can't surprise me," boasted Mrs. Milo Lawhead some time ago, but she changed her mind when Miss Dolly Snook had 32 of her friends and neighbors walk in on the said woman's fifty-fourth birthday anniversary. Every one reports a very good time and the refreshments were delicious.

TODAY IN CONGRESS

IN THE SENATE
The 13th day of the tariff filibuster. Joint sub-committee on Pacific naval bases continues writing of reports. Manufacturers Committee to close Calder Coal Bill hearings. Senator Borah to address the Senate on naval disarmament.

IN THE HOUSE
Agriculture Committee continues Knyon-Kendrick packer regulation bill recently passed by the Senate. Ways and Means Committee continue tariff hearings on flax and hemp. Foreign Affairs Committee considers bill to purchase embassies. Investigation of the army purchase board continued by the war expense committee.

ODDS AND ENDS AND THINGS

By "Skinney"

The article on "Bed Bug Collage" in the column yesterday moved W. E. Wallace, Esq., to present us with the following article on the subject taken from the chapter on "early education" in the history of Clearfield county. The sketch is from the pen of the late Dr. A. T. Schryver. It follows:

"A log cabin used to stand on the river bank in Reedsville, (Corner of Second and Spruce streets) now Clearfield borough. It was old and abandoned but in 1859 common schools were held in it for Lawrence township. The logs were rotten and alive with bedbugs. When the room was thoroughly warmed these would come forth and feast upon the scholars and greatly annoying them. From this circumstance the place was called 'Bed Bug Seminary.' The first school was taught here in 1858-9 by Dr. Schryver. Daniel Connelly, was the next teacher in 1859-60.

In 1862 it was replaced by a new building some distance from the river, which was abandoned later and is now used as a dwelling house.

School was held every day during the week in the early schools, and latterly every second Saturday was a holiday.

We are all more or less inclined to hold up our hands in holy horror at the pranks and horse play of the "rising generation" and always wind up with "the youth of this generation are the worst ever." But are they now. Let us be fair, and in being fair let us go back to Dr. Schryver's day and see what our great granddaddies and grandmas used to do. We take the following from Dr. Schryver's history of early education in Clearfield county.

Dr. Schryver taught school in the grand jury room of the Court House in Clearfield in 1829-30. In speaking of the youth of that time and the years immediately succeeding he says: "The scholars of these early days were very much as they now are. Boys are boys the world over. They never waited for something to turn up, but often-times turned things upside down to suit themselves. This was especially the case about Christmas time and the other holidays. At these times the scholars run the schools to suit themselves. They would sometimes lock the teacher out for a whole week, barricading themselves in the school room. The obnoxious system of treating was in existence then as now. If the teacher did not treat when demanded, the girls would urge the boys to declare a lock-out and bar the door. The pupils once levied on me for a treat and handed this paper up to me, to wit:

"Master, we want a treat; please furnish:

Candy, 2 lbs.
Raisins, 2 lbs.
Ginger Cakes, 3 dozen
Apples, 2 bushels
Whiskey, 2 quarts.

Please sign your name."

Imagine the Clearfield High School boys demanding that Supt. Zerfoss provide them with two quarts of "likker" at \$12 per. Would they get it—well, not quite.

The history of Clearfield county from which we quote further says: "It is stated on good authority that whilst Daniel Spackman was the master at the school house near his home in Lawrence township, that there was a lockout of some duration. Getting tired of the protracted rest given the master (who was no doubt earning at least \$10 per month) William Reed, one of the school directors, conceived the idea of smoking the boys and girls out, but knowledge of his plan in some way got to the scholars and they prepared themselves for the emergency by taking a long pole into the school house with them. The school-master and Mr. Reed came and sought admission in vain. Mr. Reed thereupon climbed upon the roof, placed the board over the chimney and seated himself upon it. As soon as the smoke began to inconvenience the scholars, they put the pole, which they had taken the precaution to provide, up the chimney, and using it as a battering ram against the board, knocked Mr. Reed and his board off the chimney and to the ground, causing him severe injury."

Can you imagine President of the School Board Albert D. Bigler climbing to the roof of the high school building board in hand to smoke out bawky students in order that the teachers might get in to open school.

Jonathan Ogden, of Mt. Joy, hands the colyum the following old-time riddle which he says none of

START TOMORROW AND KEEP IT UP EVERY MORNING

Get into the habit of drinking a glass of hot water before breakfast.

Millions of folks bathe internally now instead of loading their system with drugs. "What's an inside bath?" you say. Well, it is guaranteed to perform miracles to hot water enthusiasts.

There are vast numbers of men and women, who, immediately upon arising in the morning, drink a glass of hot water with a teaspoonful of

limestone phosphate in it. This is a very excellent health measure. It is intended to flush the stomach, liver, kidneys and intestines of the previous day's waste, sour bile and indigestible material left over in the body which if not eliminated every day, become food for the millions of bacteria which infest the bowels, the quick result is poisons and toxins which are then absorbed into the blood, causing headache, bilious attacks, foul breath, bad taste, colds, stomach trouble, kidney misery, sleeplessness, impure blood and all sorts of ailments.

People who feel good one day and badly the next, but who simply can not get feeling right are urged to obtain a quarter pound of limestone phosphate at the drug store. This will cost very little but is sufficient to make anyone a real crank on the subject of internal sanitation.

PRACTICAL APPLICATION OF ROTARY

The Rotary creed is fully set forth in the "Rotary Platform" and in the "Rotary Code of Ethics." The Rotary Platform was adopted by the organization in 1911 and is a concise statement of the principles and ethics guiding and actuating all Rotary Clubs. "The Rotary club demands fair dealing honest methods, and high standards in business," is the theme of this platform, and the last sentence in the platform, "He profits most who serves best," has been adopted as the latter part of the official slogan of Rotary "Service Above Self—He Profits Most Who Serves Best."

The "Rotary Code of Ethics" was adopted by the organization in 1915 and sets forth the principles and practices that "should exist not only between Rotarians but all business and professional men everywhere."

One of the world's greatest statesmen has said that no man should be a member of a profession without having raised the level of that profession a little higher. Rotarians consider this one of their greatest responsibilities and are duty bound to transmit the ideals of service as exemplified by Rotary to their respective crafts and professions. Obviously a man's own house must first be in order before he can successfully fulfill this responsibility to his craft or profession so that Rotary teaches first the individual member, permeating him with the spirit of Rotary so that he is soon not only practicing its principles but seeking at the same time to raise a little higher the level of his own craft.

Rotary club activities are many and varied. They are usually confined locally to activities which no other organization is formed to accomplish. Taking the activities of all Rotary Clubs the world over they touch every phase of community life. For example, a department of boys work is one of the several departments at the central office at Chicago made necessary because of the interest manifested by Rotary Clubs in this work. Rotary Boys Work is not confined to any one phase. Boys' clubs have been established and vocational training made a part of the school curriculum through the agency of Rotary Clubs in various cities. Several other Rotary clubs have made a notable success in their humanitarian work among the crippled children of the poor. This work has included the raising of funds to provide hospitals and homes for such children where their deformities can be corrected by such operations and by the use of such appliances as the best surgical skill and medical science can provide.

But boys work, as stated before, is only one of many activities. Rotary Clubs in many cities have been instrumental in arousing a civic pride and consciousness that has resulted in the preparation and adoption of city beautiful plans; erection of club houses for soldiers and community settlement houses and the providing of night schools for aliens and their instruction in the fundamentals of Americanism. Better public highways, "get-together meetings" of farmers and business men, community singing, employment of visiting nurses, safety-first campaigns, in fact, a complete list of the various activities of Rotary Clubs would take up many columns and would include nearly every phase of man's endeavor toward making his city, his state and country a better place in which to live.

There are any number of instances where Rotary Clubs have been called upon for service in times of great stress. Probably the most striking example was at the time of the influenza epidemic in the United States and Canada when many clubs were suddenly called upon to make surveys of hospital facilities, organize available local resources for fighting the epidemic, and securing nurses from less-afflicted communities.

Something About Olives.

Like other fruit trees, the olive tree has many enemies, including birds and insects. The most dreaded of these is a small fly called dacus eleg, half the size of a house fly. It is calculated that a single fly will destroy 300 or 400 olives. The only remedy is to gather the fruit early, and by crush it at once destroy the larvae.

Pollen Carried Far by Wind.

Wind-blown pollen ("sulphur rain") is known to be carried far. Hesselman, of the Swedish experiment station, reports a quite extensive rain of tree pollen on two fire ships 20 and 37 miles from shore; and the pollen of algae is known to have been carried even as far as 200 miles.

Income Tax

The Internal Revenue Bureau has assigned Mr. R. C. Bundy, Deputy Collector, of DuBois, Pa., to be at our banking rooms for the week beginning January 31 and ending February 5 for the purpose of assisting the public in making up their income tax returns. You are invited to take advantage of this convenience.

Feb. 5	13 "

The Christian and Missionary Alliance will have preaching service at United Christian church Sunday, January 30th at 11:15 a. m. at Curwensville, Pa. by Rev. A. N. Salvie. All welcome.

Percey Maurer, who has been confined to his bed room for some weeks past with inflammatory rheumatism is now able to come downstairs and remain part of the day.

The funeral services over the body of William Force was held at the home of Mr. Mrs. Kline Farwell, on Ridge avenue, at 9 o'clock today. Rev. John Cameron, pastor of the Baptist Church preaching the funeral discourse. Immediately after the service was over, the body was taken to the Greenville Cemetery, in Bloom township, and laid in the family plot.

Mrs. W. E. Hudson, came from Olean, N. Y., yesterday for a short visit with her parents, Mr. and Mrs. Lew J. LaPorte, on Pine street.

Mrs. Joseph Malloy and son Sheridan, who are in Philadelphia as witnesses on the Brines murder case. They were on the witness stand Thursday, and their testimony was quite damaging for the Brines side of the case.

Small cards were put into the Curwensville homes yesterday, announcing that evangelist services would be conducted in the United Christian Church, on north Elbert street, by a Messrs. A. Jeffrey and S. Donaglass. These services, so says a reading on the card, are "strictly orthodox and we appeal to you to co-operate with us for the betterment of your community." These meetings will commence on Sunday, January 30th.

Curwensville people were very much pleased in reading the glad tidings published in The Progress one evening this week, that the piece of road between this place and Grampian was to be made into a substantial state highway. A survey is to be made next month, and several changes will be made, from the present road traveled, which will be beneficial to all and have considerable hill climbing for autoists. Bids for making this stretch of highway will be advertised for and contracts awarded in time so that work can be started on the job as early as the spring weather will permit.

Curwensville people who contemplated putting away river ice for their own summer convenience have commenced to look a little blue around the gills, fearing that the ice crop will be a failure. Curwensville ought by all means to have an ice plant, and that would save all this anxiety of depending on river ice.

A class of young men, some dozen or more in number have taken up draughting and blue print making. They meet once a week in a room in the High School building, and are instructed by Chas. Sweeney. Each student has a full set of instruments and all seem to be taking a great interest in the work.

Dr. Erhard has had placed on the wall of the room used as a waiting room adjacent to his office, the mounted head of a young, two prong buck. It is one of the finest specimens we ever saw. The Taxidermist who did the work, certainly made the buck life like, and at first glance it would almost impress the animal was alive.

George Fleming, who has been bothered more or less with stomach trouble for some years, went to Clearfield yesterday and had several X-Ray pictures taken.

Sunday forenoon the solemn rite of baptism will be administered to a number of converts in the M. E. church. They will also be taken into membership on six months probation, at the end of that period they will be admitted into full fellowship and membership if they so desire.

WOODLAND

Mrs. A. J. Eshelman is visiting her son Cloyd, who is located in Marcus, Ohio.

Miss Marjory Snyder, who is in the Bradford City Hospital, visited her home here the early part of the week.

Mrs. Samuel Snyder and children of Gintown, spent Thursday at the home of Mrs. Snyder's parents Mr. and Mrs. David Campman.

Woodland Odd Fellows to the number of twenty-two attended lodge in Clearfield on Tuesday evening.

The M. E. Sunday School are justly proud of their fine Young Mens Class, of which Mr. John Pickles is teacher. The class numbered fifteen strong on Sunday morning last. They are determined not to allow any other class to beat them in the collection, neither are they going to allow the Young Ladies Class to get a head of them as they are planning to furnish their class with chairs. They surely deserve a word of appreciation and encouragement from the rest of the S. S.

The Bazaar given in Swift's new store building on Thursday afternoon and evening by the W. C. T. U. of this place was a great success. There was an abundant supply of articles of every description for sale and the room and booths were prettily and tastefully decorated. The Tea Room, Fortune Teller, Rebecca at the Well and Fish Pond were in evidence, very well carried out and well patronized.

The Bazaar netted the nice sum of \$250, which we understand will cover and is to be applied on the plans now being made by Mr. Chaplin of Clearfield for a centrally located graded school building for the pupils of the town. The erection of which the Woman of the town hope to bring about in the near future.

Our mutual friend Paul Shirey, the genial auto man, whom the little God Dan Cupid finds a very difficult case to deal with, as Paul is very shy of any net Dan spreads for him, came very near being caught last week, as Dan had hired Paul to take a young couple to Clearfield one morning and to have them at the ministers house at 7 o'clock a. m. to be married. Now Paul agreed to take the couple but he was not asleep and Paul was not going to catch him napping. Paul was on time at 7 o'clock with his car, but for some reason did not have his couple ready and after waiting some time Paul left and Dan was in the lurch and hard put, too, as he had contracted to pull off this wedding as per schedule, so Dan hustled around town and tried again to get Paul to take the couple to Clearfield but it was all off with Paul, so Dan got Charley Myers to help him and between them they finally got them to town and Dan was happy but he is still laying for Paul and possibly he may catch him yet.

Washington's Political Faith.

Washington was a Federalist, and a strong party man at that, but he was unanimously elected to the presidency by the Federalists and Democrats. He was also the unanimous choice when running for re-election. John Adams was vice president under Washington and succeeded him in the presidency. There was a contest, however, in 1796 between Adams, Federalist, and Jefferson, Democrat, in which the former was the winner.

The FRANKLIN

FRANKLIN OWNERS can make authoritative comparisons because 95% of them have previously owned other cars. We recently asked a large number of them to name the Franklin advantages. Here are the results, in order—

1. Riding comfort
2. Tire mileage
3. Gasoline economy
4. Direct air cooling
5. Easy handling
6. Low upkeep cost

The Franklin does what it was designed to do when its principles of light weight, flexibility and direct air cooling were adopted 19 years ago.

Any motorist can easily make further comparisons with these Franklin owners' figures:

20 miles to the gallon of gasoline
12,500 miles to the set of tires
50% slower yearly depreciation
(National Averages)

Big Reduction!!

\$30.⁰⁰ Decline on all
Great Majestic Family Ranges

Manufacturer takes lead in sweeping range price reduction.

This reduction has come somewhat sooner than we expected. We are glad, at this time, to pass the news on to our customers.

In a letter just received from the Majestic Manufacturing Co., we have been instructed to reduce prices on all Majestic Family Ranges.

This decline is an extraordinary effort on the part of the manufacturers and ourselves to stabilize business in general.

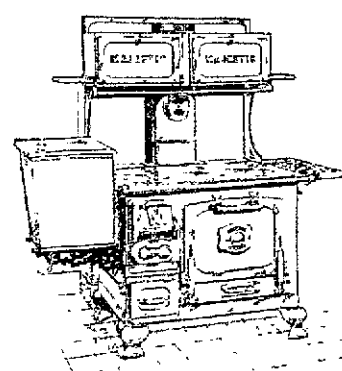

Through co-operation of Majestic Dealers and the factory this exceptional decline was decided on at this time, rather than gradual reductions throughout the year.

Those familiar with continued high costs of iron and labor, will wonder how this great reduction can be made now, but some one had to take the initiative, and we are proud to announce that the Majestic people are setting the pace.

The Majestic Manufacturing Co., and the Majestic Dealers throughout the United States, decided to take their loss all at one time rather than string it out over the entire year 1921.

In the New Model Majestic we offer the highest standard of range perfection, and with this extra low price, probably lower than it will be this fall, there is no reason why your kitchen should be without one of these wonderful ranges.

Our stock is complete—
take advantage of this opportunity

"THE SLIM PRINCESS"

George Ade's Famous Story

In the kingdom where the Slim Princess lived, all daughters of royalty were expected to be large and plump, otherwise it was impossible to get a husband. The little S. P. wished for a man, and she nearly had one hooked when the bubble burst in the form of a balloon which she wore in lieu of weight—but something happened and the S. P. won a husband after all. SEE IT!

Ocean's Floor an Advertisement.

The floor of the ocean is used for advertising purposes in southern California. The water of the vicinity is traversed by glass bottomed boats that enable tourists to see the submarine landscape.

Champion Almanac Hoarder.

A Philadelphia who has reached the age of one hundred and two years has accumulated the greatest collection of almanacs in the world. And yet they want to give us monkey glands to make us live longer.—Cartoon's Magazine.

How Nature Scatters Seeds.
Nature seeks other means than that of the wind to carry seed from place to place. Whoever tramps through the autumn woods must needs extricate himself from patches in which ticks and burrs have made life miserable for him. All over his clothes will be sticking the hairy, two jointed pods or seed vessels of the tick.

TWO SISTERS GET HELP

Praise Lydia E. Pinkham's Vegetable Compound for what it did for Them

Hagerstown, Md.—"I was overworked and my monthly periods stopped. My body was swollen and I often had pains so I had to lie down. I was treated by a physician, but he did not seem to help me at all. My sister had taken your medicine with great results so I took Lydia E. Pinkham's Vegetable Compound and now I am able to work and feel like working. I have been recommending your medicine to my friends, and you are welcome to use my testimonial for I can never praise your medicine enough for what it has done for me."—RHODA E. CARBAUGH, R. R. 1, Hagerstown, Md.

Women will tax their powers of endurance to the limit before giving up, and it is then some womanly ailments develop and they have to give up entirely. When a woman suffers from such symptoms as irregularities, headaches, backaches, bearing-down pains, inflammation, nervousness and "the blues," it is well for her to profit by Mrs. Carbaugh's experience and try Lydia E. Pinkham's Vegetable Compound. It has restored multitudes of women suffering from just such ailments.

THE GRANARY

A Column of News and Timely Topics for the Man Who Feeds the World

VELVET BEANS MAKE GOOD GRAZING CROP

Excellent for Cattle and Hogs in Fall and Winter.

Usual Period for Pasturing Is About Three Months but This May Be Lengthened or Shortened as Deemed Advisable.

Velvet beans are an important grazing crop for cattle and hogs in the South in autumn and winter, according to specialists of the United States Department of Agriculture. They are not grazed well by horses or mules, or by any live stock until after they are well matured or frosted. As the leaves, vines and pods decay but slowly when subjected to weather conditions, velvet beans will furnish feed until early spring. It is usually better to let the crop stand until it is well matured, or until it is killed by frost, as the leaves will be off the plants at that time and the corn which has been planted at the same time may be gathered with less difficulty.

The amount of grazing which will be afforded will, of course, vary with the growth of the crop and the quantity of corn not gathered, but it is the custom with many cattlemen to allow one-third to one-half acre a month for each steer or cow. The usual period for pasturing velvet beans is about three months, but this may be shortened or lengthened as deemed advisable. When the period is longer because of large acreage in proportion to the number of cattle there is necessarily some loss of feed through decay.

Hogs should be permitted to follow the cattle, as they will consume practically all the beans which the cattle fail to get. A common practice is to allow one or two hogs in addition to the cattle for each acre of beans. A good stand of velvet beans should produce about 150 pounds of beef and 100 pounds of pork an acre.

QUALITY IS URGENT FACTOR

Striking Example Furnished by Kentuckian, Who Markets Eggs, Poultry and Fruit.

An example of the part that quality plays in a business of direct marketing of farm produce is furnished by the experience of a man in Kentucky who markets eggs, dressed poultry, meats and fruits to consumers in Nashville, Tenn.

The business was established over two years ago by obtaining a friend as the first customer. From this modest beginning the producer has obtained sufficient customers to buy all of the high-grade produce he can supply. Most of the shipments are made by parcel post.

A CORRECTION

The driver of the Independent Oil Company's truck from which truck the gasoline escaped at the time of the fire in the Halford Ogden garage, has requested a correction of the story told at the time of the fire, to the effect that it was thought the tank was empty when the truck was taken into the garage for repairs.

Instead of being empty the tank contained fifteen gallons of gas which was left therein at Mr. Ogden's request and for his use, and not negligently or carelessly.

DUBOIS DOWNED NEW BETHLEHEM

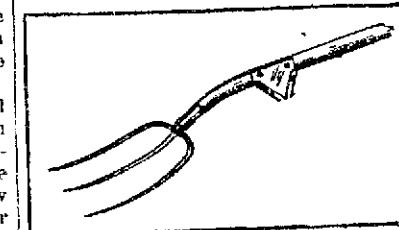

Showing old time form the Dubois High School basketball five defeated the New Bethlehem high school team last evening in the high school gym by the score of 44-29. Although the score would indicate a fast and exciting game it was not so, as it was very slow but nevertheless it was somewhat interesting from the Dubois standpoint as it was the first game they have won in the N. W. P. I. A. L. this year.

The business is conducted on the basis of high quality with adequate returns, says the United States Department of Agriculture. Customers are selected with as much care as most consumers show in selecting a produce from whom to buy farm produce. Customers are retained by never breaking the rule to supply only the best produce raised on his own farm. If, when an order is obtained, this farmer does not have produce of the highest quality, he informs the customer and states that unless otherwise instructed the produce will be shipped at the earliest possible date.

USEFUL FOR CUTTING BANDS

Device Illustrated is Handy for Man Pitching Bundles to Shredder or Silo Filler.

The following is a handy way for cutting bands. The man who is pitching bundles to a corn shredder or silo filler can cut the bands as he pitches them to the machine, thereby saving the aid of one man to cut the bands.

Band Cutter for Bundles.

I also find it handy to cut the shock ties on corn when loading from the field, says a writer in the Farmer. To make same I attached a mower sickle section to the fork handle, as per illustration.

UNITED STATES APPLE CROP

Official Estimate Is Given at 223,000,000 Bushels, an Increase Over July Figures.

The official estimate of the apple crop in the United States is given as 223,000,000 bushels, and the commercial crop at 33,900,000 barrels, which is an increase of 3,666,000 barrels over the estimate given for July.

CLEAN EGGS BRING PREMIUM

Dirty Product, No Matter How Fresh or How Large, Always Sells at Big Discount.

Eggs that command a premium are, first of all, spotlessly clean. A dirty egg, no matter how fresh or how large it is, is always sold at a discount. One or two dirty eggs in a dozen will lower the price for the whole dozen.

So is the Price.
The power derived from a pound of coal today is nearly three times as great as it was 50 years ago.

PUNXSU WINS FROM REYNOLDSVILLE

The Punxsu team journeyed to Reynoldsville last evening and defeated the high school team at that place by the score of 33-29 in a game that would rival the game at Brookville for closeness.

HOW THEY STAND

The official standing of the W. P. A. L. following the games last evening's games is as follows:

Punxsu	4	0	1,000
Clearfield	3	1	750
Brookville	3	1	750
DuBois	1	3	250
New Bethlehem	1	3	250
Reynoldsville	0	4	000

IT'S GOOD FOR CHILDREN

Mrs. C. E. Schwab, 1007 Fourteenth street, Canton, O., writes: "We use Foley's Honey and Tar for coughs and find it one of the best remedies on the market, especially for children's coughs, as it does not contain any drug that is harmful." Serious sickness often follows lingering colds. Hard coughing racks a child's body and disturbs strength-giving sleep, and the poisons weaken the system so that disease cannot be warded off. Take Foley's in the —Adv

Print Paper and Alcohol

[National Crop Improvement Service.]

WHERE is the genius which will make it possible for every farmer to produce his own power from farm wastes?

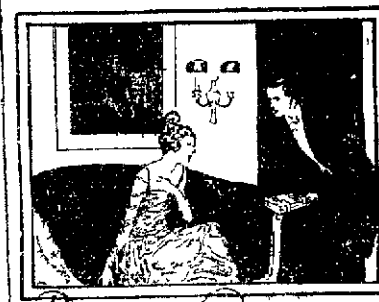

Where is the dreamer who will provide print paper at a reasonable price from vegetation which is allowed to rot after having been produced?

Both of these ideas have been practically proven. We know that there is alcohol in the corn stalks," says Mr. Frank Baackes, vice president American Steel and Wire company, "and we

know that we can produce paper from the pulp which is left

"Now the question is how are we going to accumulate and concentrate enough produce to make such a process economical and practical? Good roads will help.

"Our quality supply must be augmented by a readily available substitute. Our spruce trees cannot last forever. It is high time therefore that we begin to plan the future of both of these great subjects, power and print paper."

SENATOR JOHNSON SCORES AGREEMENT OF AMBASSADOR MORRIS WITH JAPAN

WASHINGTON, January 29—"An agreement between Ambassador Morris and Ambassador Shidihara of Japan has created a situation that 'is intolerable to the people of California' Senator Hiram Johnson of California declared today in the Senate. While Johnson spoke on the proposition Secretary of State Colby was conferring with President Wilson in the White House for the first time since the Secretary left for South America about six weeks ago. It was said that the Morris-Shidihara agreement would be discussed during the conference.

PRELIMINARY REPORTS SHOW JAP SENTRY GUILTY KILLING U. S. OFFICER

TOKIO, January 28 (Delayed)—The Japanese sentry who shot and killed Lieut. W. H. Langdon, U. S. N. at Vladivostok three weeks ago has been adjudged guilty in a report of the preliminary inquiry filed with the court martial in chief according to a Vladivostok dispatch to the newspaper Ji Ji Shimpō.

UNIONTOWN, January 29—A sentence of from 48 to 85 years in prison was imposed on Albert Smith, aged 19, here today after he pleaded guilty to charges of arson. Smith is alleged to have fired many buildings in Fayette County and surrounding territory. Residents were in a state of terror as blaze after blaze broke out in isolated sections. Smith is alleged to have made a confession but later retracted it. Today he pleaded guilty. He was sentenced to ten years each for four charges of felonious arson and two to five years for nine charges of plain arson.

FOUR KILLED BY EXPLODING BOILER OF ENGINE ON THE B. & O. RAILROAD

WHEELING, W. Va., January 29—Four men were killed when the boiler of an engine on the Wheeling division of the B. & O. blew up from an unknown cause at Floyd near here today. The dead are: M. J. Walsh, road foreman of Wheeling, O. J. Carpenter of Machen, W. Va., O. H. Wilford, fireman of Holly Grove, W. Va. and O. E. Grogan, brakeman of Wheeling. The train was en route from this city to Bentwood, W. Va.

BERGDOLL AND STECHER ISSUE STATE- MENT OF INSULT TO ALL AMERICANS

BERLIN, January 29—Grover Bergdoll, American draftsman and his chauffeur Isaac Stecher who recently fled from the United States today issued the following statement: "We intend to return to America if America needs us and when there are honest men at the head of the American government."

CHURCH DYNAMITED WHILE PRAYER MEETING WAS IN PROGRESS AT NIGHT

WILKES BARRE, January 29—While prayer meeting was in progress last night the United Evangelical church in Slocum township this county was wrecked by an explosion of dynamite. About 50 persons were in the church at the time but none were seriously injured. The state police believe it was caused by boys who had been warned from playing around the church property.

PHILADELPHIA JUDGE FREES BRINES SAYING EVIDENCE NOT SUFFICIENT

PHILADELPHIA, January 28—William Brines was acquitted today of the charge of killing Elmer Drews. The University of Pennsylvania sophomore was freed on the ground that insufficient evidence had been submitted to connect him with the Dartmouth College senior's death.

Judge Ferguson of the criminal court, before whom the case was tried, in his charge to the jury, pointed out that no evidence had been submitted to prove that Brines met Drews on the day of his death and that the evidence submitted against the defendant was circumstantial.

He directed the jury to bring in a verdict of not guilty on the bill charging murder, and upon the manslaughter bill as well. The jury immediately returned the verdict without leaving the box. The foreman said it had been unanimously decided by the jury last night at the close of the prosecution to acquit Brines.

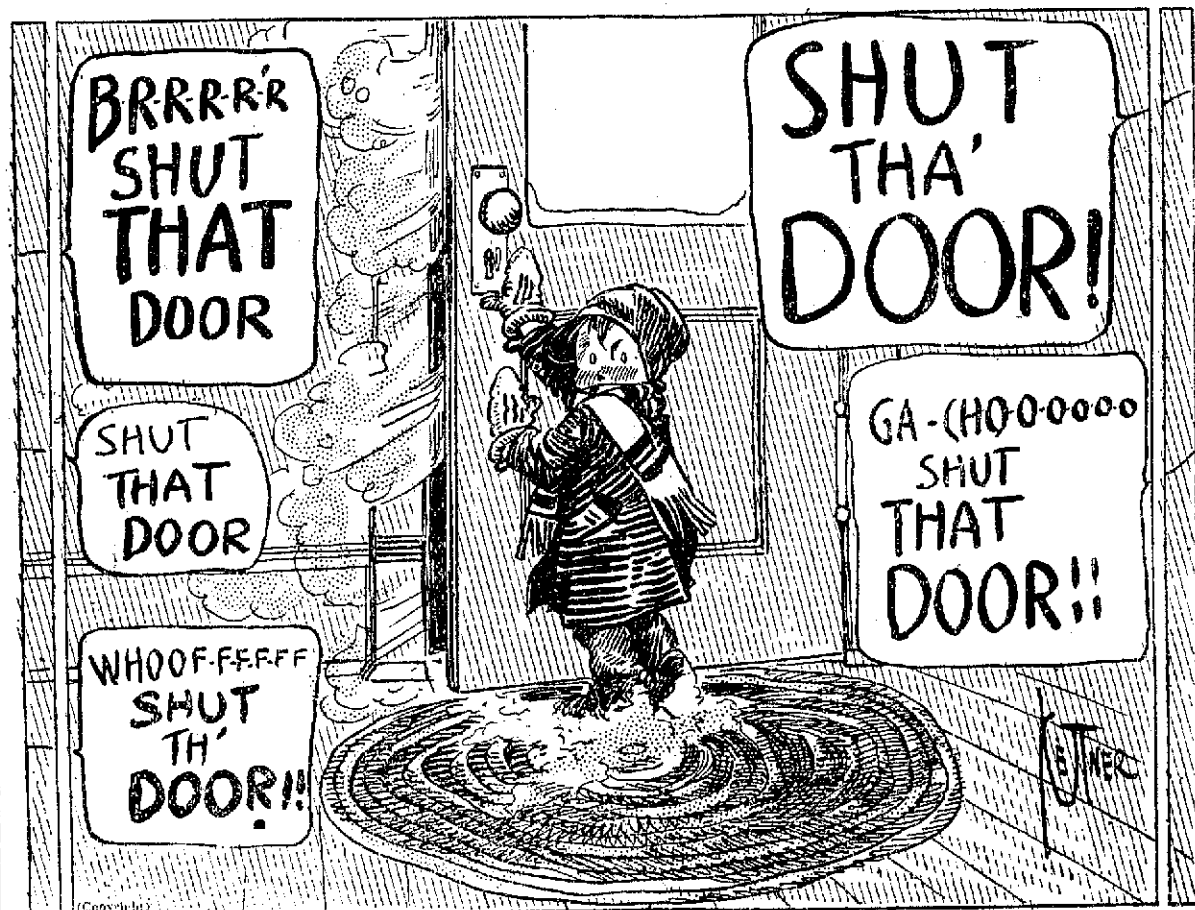

CELEBRATED SILVER WEDDING

Mr. and Mrs. Frank Ruffner celebrated the twenty-fifth anniversary of their wedding at their home on Clearfield street on Thursday evening last. A number of friends were present and enjoyed an elegant dinner. Mr. and Mrs. Ruffner were handsomely remembered by their friends, who expressed the hope that their hosts would live to see the silver turn to gold.

CLEARFIELD HARDWARE CO. WINDOW WINS PRIZE

The National Mazda Stimulator recently offered prizes for the best window displays of the white Mazda lamps. Retail stores throughout the country participated. Fourth prize was won for the Clearfield Hardware Company's display. The window was decorated by Way Powell, who very naturally feels quite elated over the award.

Greetings and Salutations

PARIS, January 29—The amount of the German reparation to the Allies will be announced at 6 o'clock this evening it was announced by the Supreme Council today.

HENRY STEPHENS OF CARLISLE SUFFERS SLEEPING SICKNESS

Prof. Henry M. Stephens, of the faculty of Dickinson College, is very ill at his home on South College street, Carlisle, with what his physicians believe to be sleeping sickness. Prof. Stephens, who is head of the department of biology at the college, took ill Monday a week. He met one of his classes on that day in his home but later was forced to take to his bed.

Dr. Rickenbaugh, of Carlisle, the attending physician, called in for consultation two Harrisburg physicians, Dr. Charles Rebeck and Dr. J. B. McAllister, and they agreed that the case was one of sleeping sickness.

Sleeping sickness is a disease of the nervous system which has appeared at many cities throughout the country during the past two years. The germ has never been isolated. It takes from several weeks to a number of weeks for the disease to run its course. It is not contagious and there is no quarantine.

It was stated today that the patient is doing as well as can be expected. Prof. Stephens' father died Sunday afternoon at an advanced age.

WEST VIRGINIA MURDER TRIAL JURY NEARS COMPLETION

Williamson, W. Va., Jan. 22—Completion of the jury is probable tonight in the trial of Sid Hatfield and 22 others for the slaying of 7 detectives at Matthews last May. Approximately 80 men have been excused from jury service. Most of them being automatically disqualified by the ruling of Judge Bailey that no one connected with the United Mine Workers of America or with the coal operators is eligible for jury duty. More than half of the jurors examined yesterday were related to one or more of the defendants.

NOON STOCKS

New York—Closing prices on the stock exchange today were: American Locomotive, 83; American Steel Foundry, 30 1/8; American Woolen, 67; Anaconda, 39 1/4; Baldwin Locomotive, 89 7/8; Bethlehem Steel, 55 1/4; Bethlehem Steel B, 57 3/8; Central Leather, 41; Crucible Steel, 95; Erie, 13 1/2, preferred, 19 7/8; General Electric, 123 1/4; General Motors, 15; Maxwell, 5 3/4; Middle States Oil, 13 1/2; Midvale, 31 1/2; Okla. Producers, 3 5/8; Penna., 4 3/4; Pittsburgh Coal, 61; Reading, 84; Republic Steel, 67; Sinclair, 24 1/2; U. S. Steel, 83 1/8.

CLEARFIELD TEAM AMERICAN LEGION TRIMS BELLEFONTE

Old Time Stars Quickly Get Back to Form And Centre County Warriors Stood No Chance.

CLARK MITCHELL STARRED

Our American Legion boys went over the top last evening when they defeated the Bellefonte Legionnaires by the score of 37 to 16. The first half ending 15 to 10 with the local five in the lead.

Both teams wore blue jerseys and this similarity caused the veterans to "look for the whites of their eyes" before passing the ball, some what slowing up the floor work in the first period. But with army strategism our boys wisely discarded the blues and donned white jerseys. The resulting teamwork in the second period netted the locals 22 points to the visiting teams 6, allowing the latter but two field goals.

Clark Mitchell played a stellar game for Clearfield, caging 7 field goals and dropping in 6 fouls out of 11 tries.

Way Powell, better known as Dud, contrary to his name was very much alive and started in the second period ringing up three baskets in quick succession.

Wayne Johnson was the pivot man for our team and caged two field goals. Harold Robison played a fast game at guard and found time to drop in a basket. Jimmy Mitchell played a good floor game as did Ted Leitinger, the latter scoring five points.

The Legion band furnished the music for over four hundred people who attended the game. Line-up:

Clfd. A. L. Pos Bellefonte
C. Mitchell F. Schad
Leitinger C. Cruse
Johnson C. Decker
J. Mitchell G. McGinley
Robison G. McClellan

Goals from field-C. Mitchell, 7; Powell, 3; Johnson 2; Leitinger, 1; Robinson, 1; Decker, 2; Schad, 1; Cruse, 1; McGinley, 2. Goals from four-Leitinger, 3 out of 6; C. Mitchell, 6 out of 11; Schad, 2 out of 4; Cruse, 1 out of 3; McGinley, 1 out of 3. Substitutions—Clearfield, Powell for Leitinger, Farren for Schad; Bellefonte, Morrison for Shad. Referee—Walter Flegel. Time keeper—Heisey. Time of periods—20 minutes.

Byron Chaplain, of State College, is visiting his parents Mr. and Mrs. John Chaplain on Nichols street.

Mrs. John Daugherty spent yesterday with friends in Curwensville.

Toledo, O., Jan. 29—President-elect Harding is wearing his last year's overcoat, Paul Gettman, his tailor, reported today. Gettman was interviewed regarding Harding's wardrobe. It had been rumored that he had ordered a large and expensive wardrobe. He said Harding's wardrobe consists of one black inaugural suit, two spring suits and two fall suits. The inaugural suit is of black unfinished worsted plain coat and unbraided. The coat being of the one button, cut away frock variety.

NEW STATE COLLEGE PRESIDENT IS JOHN MARTIN THOMAS

Vermont Man is Elated At Opportunity to Head Big Agricultural School and Will Accept Quickly.

SPARKS IN HISTORY CHAIR

Dr. John Martin Thomas, for 12 years president of Middlebury College, Vermont, who was invited yesterday to become president of Pennsylvania State College, succeeding Dr. Edwin E. Sparks, who resigned last June in a dispatch from New York last night, said that he expects to accept the post. Soon after the invitation was announced Dr. Thomas submitted his resignation at Middlebury.

The selection of Dr. Thomas was made Tuesday at the semi-annual meeting of the board of trustees of State College, and the invitation was extended to him in New York by a member of the board. Judge H. W. Mitchell, of Pittsburgh, its chairman, class of 1890, State College, has been taking care of the executive work of the college since Dr. Sparks' retirement.

Possibilities Irresistible

In his statement from New York Dr. Thomas said:

"As one of the large state institutions of the United States and the land grant college of the commonwealth which is second in agricultural importance, as well as in population and resources, the position offers possibilities which I cannot refuse. I expect to accept."

Dr. Sparks, for 12 years president of State College, will remain as a lecturer on American history.

JEANNETTE POLICE SHOT TO DEATH

Jeannette, Jan. 23—Policeman Jos. Bossard, aged 45, was shot and killed here early today while patrolling his beat on 11th street. James Marshall, a negro and his wife and Chas. Hunter are being held in connection with the shooting. According to the police Marshall came to the police station and said someone shot through the door of his house. The policeman was found later. Marshall's house has been under surveillance by the police for some time.

DISTRICT GOVERNOR ASPINWALL OF WEST VIRGINIA INSTITUTES ROTARY CLUB

Large Delegations of Rotarians Come Here From DuBois, Altoona and Johnstown to See Local Club Get Under Way. Rotary Club a Novel Idea and Has Had a Wonderful Growth.

HAS RECORD FOR DOING MANY WORTHWHILE THINGS

The Clearfield Rotary Club was formally instituted last evening at a meeting held in The Dimeling hotel, which was presided over by President Dr. Ward O. Wilson and attended by Rotarians from DuBois, Altoona and Johnstown.

District Governor the Rev. Richard Aspinall, of Buckingham, West Virginia, conducted the formal institution. Dick Aspinall is one of the best known men in Rotary and added new laurels to his already great reputation as an executive and "after dinner" orator by his work last evening.

Addresses were also made by Dr. Wingert of Altoona; Delos Hibner, of DuBois; Jack Lippart, of Johnstown and A. D. Bigler, of the local club. The latter gentleman was chairman of the entertainment committee and explained that his committee had decided on four of the local members to do the talking for the "home guards." The program allowed but eight minutes for their speeches, which would give each man two minutes, and in order to save time, and for other reasons which we refuse to mention, President Wilson called upon the four designated: Messrs. Kurth, Stewart, Callahan and Connelly, to occupy two minutes jointly by all talking at the same time on subjects assigned them. The four rose to the occasion but Kurtz "raised" his voice above the others and won the hearing.

The new Club starts out with a charter membership of twenty-two.

For the benefit of the uninitiated we publish herewith a brief history of Rotary.

The True Origin of Rotary

Rotary came into being with a group of four men seated around an office table. As it happened each one of the four represented a different calling—one a coal dealer, one a mining operator, one a merchant tailor, and the fourth an attorney. The attorney, Paul P. Harris, was the one who first advanced the idea of forming a club different from any other club then known, and to him belongs the credit for starting the great Rotary movement.

The meeting of the four at which it was decided to organize a club, that now historic meeting of the four original Rotarians, was held February 23d, 1905, in the Unity Building on Dearborn street, Chicago. It was decided to invite to membership just one man from each different business, or professional calling. A printer, a real estate man, an insurance man, and a banker, were the next four admitted.

"Rotary" was chosen as the name of the new club because the members entertained the meetings in "rotation" at their places of business. As "Rotation Club" was somewhat inapt they decided to adopt the shorter form and call it the "Rotary Club."

Every Member an Active Member

The Rotary Club has one rule which must not be violated. This is the rule in regard to attendance. Practically every Rotary club has a clause in its Constitution whereby a member is automatically dropped from membership if he misses four meetings in succession. To this rule is attributed one of the reasons for the remarkable efficiency of Rotary. A careful record of each member's attendance is kept by the secretary and nothing short of sickness or death can excuse a member. Absence from the city is no excuse, for there is a rule whereby a member may attend the meeting of a Rotary Club in any city and receive credit for attendance just as if he had been present at the meeting of his own club.

LABOR COMMITTEE OF RAILROADS HAVE HARD NUT TO CRACK

Chicago, Jan. 22—Means of cutting the wages of the railroad employees were being decided upon by the Labor Committee of the Association of Railroad Executives in session here today. An agreement was reached among the five members of the committee that no drastic action must be taken immediately and that they would remain in session until they had decided what action would be taken. They hoped to make an announcement on Monday as to what steps they had taken. They expect to carry their case to the public by offering a reduction in freight and passenger rates provided they can lower the wage schedule.

SOME SURPRISE

"Can't surprise me," boasted Mrs. Milo Lawhead some time ago, but she changed her mind when Miss Dolly Snook had 32 of her friends and neighbors walk in on the said woman's fifty-fourth birthday anniversary. Every one reports a very good time and the refreshments were delicious.

Bill Ammerman was back in the line-up and his "shooting eye" was in its old-time form as Bill pocketed no less than four dandy shots from the floor.

Dick, the official dopest, was with the team and he will tell you about it Monday.

Punxsutawney won a close game from Reynoldsville and retained the lead in the pennant race. DuBois registered its first win by trimming New Bethlehem.

Albert Kennard and Aaron Dowler, of State College, are spending a few days at their respective homes.

TODAY IN CONGRESS

In the Senate

The 13th day of the tariff filibuster. Joint sub-committee on Pacific naval bases continues writing of reports. Manufacturers Committee to close Calder Coal Bill hearings. Senator Borah to address the Senate on naval disarmament.

IN THE HOUSE

Agriculture Committee continues Knyon-Kendrick packer regulation bill recently passed by the Senate. Ways and Means Committee continue tariff hearings on flax and hemp. Foreign Affairs Committee considers bill to purchase embassies. Investigation of the army purchase board continued by the war expense committee.

ODDS AND ENDS AND THINGS

By "Skinney"

The article on "Bed Bug Collage" in the column yesterday moved W. E. Wallace, Esq., to present us with the following article on the subject taken from the chapter on "early education" in the history of Clearfield county. The sketch is from the pen of the late Dr. A. T. Schryver. It follows:

"A log cabin used to stand on the river bank in Reedsville, (Corner of Second and Spruce streets) now Clearfield borough. It was old and abandoned but in 1859 common schools were held in it for Lawrence township. The logs were rotten and alive with bedbugs. When the room was thoroughly warmed these would come forth and feast upon the scholars and greatly annoy them. From this circumstance the place was called 'Bed Bug Seminary.' The first school was taught here in 1858-9 by Dr. Schryver. Daniel Connelly, was the next teacher in 1859-60.

In 1862 it was replaced by a new building some distance from the river, which was abandoned later and is now used as a dwelling house.

School was held every day during the week in the early schools, and latterly every second Saturday was a holiday.

We are all more or less inclined to hold up our hands in holy horror at the pranks and horse play of the "rising generation" and always wind up with "the youth of this generation are the worst ever." But are they now. Let us be fair, and in being fair let us go back to Dr. Schryver's day and see what our great granddaddies and grandmas used to do. We take the following from Dr. Schryver's history of early education in Clearfield county.

Dr. Schryver taught school in the grand jury room of the Court House in Clearfield in 1829-30. In speaking of the youth of that time and the years immediately succeeding he says: "The scholars of these early days were very much as they now are. Boys are boys the world over. They never waited for something to turn up, but often-times turned things upside down to suit themselves. This was especially the case about Christmas time and the other holidays. At these times the scholars run the schools to suit themselves. They would sometimes lock the teacher out for a whole week, barricading themselves in the school room. The obnoxious system of treating was in existence then as now. If the teacher did not treat when demanded, the girls would urge the boys to declare a lock-out and bar the door. The pupils once levied on me for a treat and handed this paper up to me, to wit:

"Master, we want a treat; please furnish:

Candy, 2 lbs.
Raisins, 2 lbs.
Ginger Cakes, 3 dozen
Apples, 2 bushels
Whiskey, 2 quarts.
Please sign your name."

Imagine the Clearfield High School boys demanding that Supt. Zerfoss provide them with two quarts of "likker" at \$12 per. Would they get it—well, not quite.

The history of Clearfield county from which we quote further says: "It is stated on good authority that whilst Daniel Spackman was the master at the school house near his home in Lawrence township, that there was a lockout of some duration. Getting tired of the protracted rest given the master (who was no doubt earning at least \$10 per month) William Reed, one of the school directors, conceived the idea of smoking the boys and girls out, but knowledge of his plan in some way got to the scholars and they prepared themselves for the emergency by taking a long pole into the school house with them. The school-master and Mr. Reed came and sought admission in vain. Mr. Reed thereupon climbed upon the roof, placed the board over the chimney and seated himself upon it. As soon as the smoke began to inconvenience the scholars, they put the pole, which they had taken the precaution to provide, up the chimney, and using it as a battering ram against the board, knocked Mr. Reed and his board off the chimney and to the ground, causing him severe injury."

Can you imagine President of the School Board Albert D. Bigler climbing to the roof of the high school building board in hand to smoke out bawky students in order that the teachers might get in to open school.

Jonathan Ogden, of Mt. Joy, hands the column the following old-time riddle which he says none of

START TOMORROW AND KEEP IT UP EVERY MORNING

Get into the habit of drinking a glass of hot water before breakfast.

Millions of folks bathe internally now instead of loading their system with drugs. "What's an inside bath?" you say. Well, it is guaranteed to perform miracles to hot water enthusiasts.

There are vast numbers of men and women, who, immediately upon arising in the morning, drink a glass of hot water with a teaspoonful of

limestone phosphate in it. This is a very excellent health measure. It is intended to flush the stomach, liver, kidneys and intestines of the previous day's waste, sour bile and indigestible material left over in the body which if not eliminated every day, become food for the millions of bacteria which infest the bowels, the quick result is poisons and toxins which are then absorbed into the blood, causing headache, bilious attacks, foul breath, bad taste, colds, stomach trouble, kidney misery, sleeplessness, impure blood and all sorts of ailments.

People who feel good one day and badly the next, but who simply can not get feeling right are urged to obtain a quarter pound of limestone phosphate at the drug store. This will cost very little but is sufficient to make anyone a real crank on the subject of internal sanitation.

PRACTICAL APPLICATION OF ROTARY

The Rotary creed is fully set forth in the "Rotary Platform" and in the "Rotary Code of Ethics." The Rotary Platform was adopted by the organization in 1911 and is a concise statement of the principles and ethics guiding and actuating all Rotary Clubs. "The Rotary club demands fair dealing honest methods, and high standards in business," is the theme of this platform, and the last sentence in the platform, "He profits most who serves best," has been adopted as the latter part of the official slogan of Rotary "Service Above Self—He Profits Most Who Serves Best."

The "Rotary Code of Ethics" was adopted by the organization in 1915 and sets forth the principles and practices that "should exist not only between Rotarians but all business and professional men everywhere."

One of the world's greatest statesmen has said that no man should be a member of a profession without having raised the level of that profession a little higher. Rotarians consider this one of their greatest responsibilities and are duty bound to transmit the ideals of service as exemplified by Rotary to their respective crafts and professions. Obviously a man's own house must first be in order before he can successfully fulfill this responsibility to his craft or profession so that Rotary teaches first the individual member, permeating him with the spirit of Rotary so that he is soon not only practicing its principles but seeking at the same time to raise a little higher the level of his own craft.

Rotary club activities are many and varied. They are usually confined locally to activities which no other organization is formed to accomplish. Taking the activities of all Rotary Clubs the world over they touch every phase of community life. For example, a department of boys work is one of the several departments at the central office at Chicago made necessary because of the interest manifested by Rotary Clubs in this work. Rotary Boys Work is not confined to any one phase. Boys' clubs have been established and vocational training made a part of the school curriculum through the agency of Rotary Clubs in various cities. Several other Rotary clubs have made a notable success in their humanitarian work among the crippled children of the poor. This work has included the raising of funds to provide hospitals and homes for such children where their deformities can be corrected by such operations and by the use of such appliances as the best surgical skill and medical science can provide.

But boys work, as stated before, is only one of many activities. Rotary Clubs in many cities have been instrumental in arousing a civic pride and consciousness that has resulted in the preparation and adoption of city beautiful plans; erection of club houses for soldiers and community settlement houses and the providing of night schools for aliens and their instruction in the fundamentals of Americanism. Better public highways, "get-together meetings" of farmers and business men, community singing, employment of visiting nurses, safety-first campaigns, in fact, a complete list of the various activities of Rotary Clubs would take up many columns and would include nearly every phase of man's endeavor toward making his city, his state and country a better place in which to live.

There are any number of instances where Rotary Clubs have been called upon for service in times of great stress. Probably the most striking example was at the time of the influenza epidemic in the United States and Canada when many clubs were suddenly called upon to make surveys of hospital facilities, organize available local resources for fighting the epidemic, and securing nurses from less-afflicted communities.

Something About Olives.

Like other fruit trees, the olive tree has many enemies, including birds and insects. The most dreaded of these is a small fly called dacus eleg, half the size of a house fly. It is calculated that a single fly will destroy 300 or 400 olives. The only remedy is to gather the fruit early, and by crush it at once destroy the larvae.

Pollen Carried Far by Wind.

Wind-blown pollen ("sulphur rain") is known to be carried far. Hesselman, of the Swedish experiment station, reports a quite extensive rain of tree pollen on two fire ships 20 and 37 miles from shore; and the pollen of algae is known to have been carried even as far as 200 miles.

Income Tax

The Internal Revenue Bureau has assigned Mr. R. C. Bundy, Deputy Collector, of DuBois, Pa., to be at our banking rooms for the week beginning January 31 and ending February 5 for the purpose of assisting the public in making up their income tax returns. You are invited to take advantage of this convenience.

Feb. 5	13 "

The Christian and Missionary Alliance will have preaching service at United Christian church Sunday, January 30th at 11:15 a. m. at Curwensville, Pa. by Rev. A. N. Salvie. All welcome.

Percey Maurer, who has been confined to his bed room for some weeks past with inflammatory rheumatism is now able to come downstairs and remain part of the day.

The funeral services over the body of William Force was held at the home of Mr. Mrs. Kline Farwell, on Ridge avenue, at 9 o'clock today. Rev. John Cameron, pastor of the Baptist Church, preaching the funeral discourse. Immediately after the service was over, the body was taken to the Greenville Cemetery, in Bloom township, and laid in the family plot.

Mrs. W. E. Hudson, came from Olean, N. Y., yesterday for a short visit with her parents, Mr. and Mrs. Lew J. LaPorte, on Pine street.

Mrs. Joseph Malloy and son Sheridan, who are in Philadelphia as witnesses on the Brines murder case. They were on the witness stand Thursday, and their testimony was quite damaging for the Brines side of the case.

Small cards were put into the Curwensville homes yesterday, announcing that evangelical services would be conducted in the United Christian Church, on north Elbert street, by a Messrs. A. Jeffrey and S. Donaglass. These services, so says a reading on the card, are "strictly orthodox and we appeal to you to co-operate with us for the betterment of your community." These meetings will commence on Sunday, January 30th.

Curwensville people were very much pleased in reading the glad tidings published in The Progress one evening this week, that the piece of road between this place and Grampian was to be made into a substantial state highway. A survey is to be made next month, and several changes will be made, from the present road traveled, which will be beneficial to all and have considerable hill climbing for autoists. Bids for making this stretch of highway will be advertised for and contracts awarded in time so that work can be started on the job as early as the spring weather will permit.

Curwensville people who contemplated putting away river ice for their own summer convenience have commenced to look a little blue around the gills, fearing that the ice crop will be a failure. Curwensville ought by all means to have an ice plant, and that would save all this anxiety of depending on river ice.

A class of young men, some dozen or more in number have taken up draughting and blue print making. They meet once a week in a room in the High School building, and are instructed by Chas. Sweeney. Each student has a full set of instruments and all seem to be taking a great interest in the work.

Dr. Erhard has had placed on the wall of the room used as a waiting room adjacent to his office, the mounted head of a young, two prong buck. It is one of the finest specimens we ever saw. The Taxidermist who did the work, certainly made the buck life like, and at first glance it would almost impress the animal was alive.

George Fleming, who has been bothered more or less with stomach trouble for some years, went to Clearfield yesterday and had several X-Ray pictures taken.

Sunday forenoon the solemn rite of baptism will be administered to a number of converts in the M. E. church. They will also be taken into membership on six months probation, at the end of that period they will be admitted into full fellowship and membership if they so desire.

WOODLAND

Mrs. A. J. Eshelman is visiting her son Cloyd, who is located in Marcus, Ohio.

Miss Marjory Snyder, who is in the Bradford City Hospital, visited her home here the early part of the week.

Mrs. Samuel Snyder and children of Gintown, spent Thursday at the home of Mrs. Snyder's parents Mr. and Mrs. David Campman.

Woodland Odd Fellows to the number of twenty-two attended lodge in Clearfield on Tuesday evening.

The M. E. Sunday School are justly proud of their fine Young Mens Class, of which Mr. John Pickles is teacher. The class numbered fifteen strong on Sunday morning last. They are determined not to allow any other class to beat them in the collection, neither are they going to allow the Young Ladies Class to get a head of them as they are planning to furnish their class with chairs. They surely deserve a word of appreciation and encouragement from the rest of the S. S.

The Bazaar given in Swift's new store building on Thursday afternoon and evening by the W. C. T. U. of this place was a great success. There was an abundant supply of articles of every description for sale and the room and booths were prettily and tastefully decorated. The Tea Room, Fortune Teller, Rebecca at the Well and Fish Pond were in evidence, very well carried out and well patronized.

The Bazaar netted the nice sum of \$250, which we understand will cover and is to be applied on the plans now being made by Mr. Chaplin of Clearfield for a centrally located graded school building for the pupils of the town. The erection of which the Woman of the town hope to bring about in the near future.

Our mutual friend Paul Shirey, the genial auto man, whom the little God Dan Cupid finds a very difficult case to deal with, as Paul is very shy of any net Dan spreads for him, came very near being caught last week, as Dan had hired Paul to take a young couple to Clearfield one morning and to have them at the ministers house at 7 o'clock a. m. to be married. Now Paul agreed to take the couple but he was not asleep and Paul was not going to catch him napping. Paul was on time at 7 o'clock with his car, but for some reason did not have his couple ready and after waiting some time Paul left and Dan was in the lurch and hard put, too, as he had contracted to pull off this wedding as per schedule, so Dan hustled around town and tried again to get Paul to take the couple to Clearfield but it was all off with Paul, so Dan got Charley Myers to help him and between them they finally got them to town and Dan was happy but he is still laying for Paul and possibly he may catch him yet.

Washington's Political Faith.

Washington was a Federalist, and a strong party man at that, but he was unanimously elected to the presidency by the Federalists and Democrats. He was also the unanimous choice when running for re-election. John Adams was vice president under Washington and succeeded him in the presidency. There was a contest, however, in 1796 between Adams, Federalist, and Jefferson, Democrat, in which the former was the winner.

The FRANKLIN

FRANKLIN OWNERS can make authoritative comparisons because 95% of them have previously owned other cars. We recently asked a large number of them to name the Franklin advantages. Here are the results, in order—

1. Riding comfort
2. Tire mileage
3. Gasoline economy
4. Direct air cooling
5. Easy handling
6. Low upkeep cost

The Franklin does what it was designed to do when its principles of light weight, flexibility and direct air cooling were adopted 19 years ago.

Any motorist can easily make further comparisons with these Franklin owners' figures:

20 miles to the gallon of gasoline
12,500 miles to the set of tires
50% slower yearly depreciation
(National Averages)

Big Reduction!!

\$30.⁰⁰ Decline on all
Great Majestic Family Ranges

Manufacturer takes lead in sweeping range price reduction.

This reduction has come somewhat sooner than we expected. We are glad, at this time, to pass the news on to our customers.

In a letter just received from the Majestic Manufacturing Co., we have been instructed to reduce prices on all Majestic Family Ranges.

This decline is an extraordinary effort on the part of the manufacturers and ourselves to stabilize business in general.

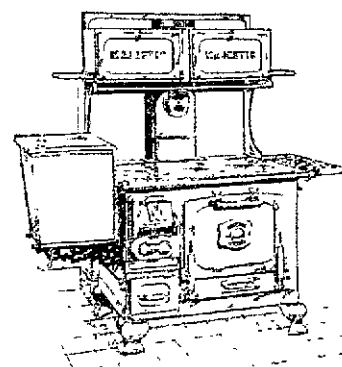

Through co-operation of Majestic Dealers and the factory this exceptional decline was decided on at this time, rather than gradual reductions throughout the year.

Those familiar with continued high costs of iron and labor, will wonder how this great reduction can be made now, but some one had to take the initiative, and we are proud to announce that the Majestic people are setting the pace.

The Majestic Manufacturing Co., and the Majestic Dealers throughout the United States, decided to take their loss all at one time rather than string it out over the entire year 1921.

In the New Model Majestic we offer the highest standard of range perfection, and with this extra low price, probably lower than it will be this fall, there is no reason why your kitchen should be without one of these wonderful ranges.

Our stock is complete—
take advantage of this opportunity

The floor of the ocean is used for advertising purposes in southern California. The water of the vicinity is traversed by glass bottomed boats that enable tourists to see the submarine landscape.

Champion Almanac Hoarder.

A Philadelphia who has reached the age of one hundred and two years has accumulated the greatest collection of almanacs in the world. And yet they want to give us monkey glands to make us live longer.—Cartoon's Magazine.

How Nature Scatters Seeds.
Nature seeks other means than that of the wind to carry seed from place to place. Whoever tramps through the autumn woods must needs extricate himself from patches in which ticks and burrs have made life miserable for him. All over his clothes will be sticking the hairy, two jointed pods or seed vessels of the tick.

TWO SISTERS GET HELP

Praise Lydia E. Pinkham's Vegetable Compound for what it did for Them

Hagerstown, Md.—"I was overworked and my monthly periods stopped. My body was swollen and I often had pains so I had to lie down. I was treated by a physician, but he did not seem to help me at all. My sister had taken your medicine with great results so I took Lydia E. Pinkham's Vegetable Compound and now I am able to work and feel like working. I have been recommending your medicine to my friends, and you are welcome to use my testimonial for I can never praise your medicine enough for what it has done for me."—RHODA E. CARBAUGH, R. R. 1, Hagerstown, Md.

Women will tax their powers of endurance to the limit before giving up, and it is then some womanly ailments develop and they have to give up entirely. When a woman suffers from such symptoms as irregularities, headaches, backaches, bearing-down pains, inflammation, nervousness and "the blues," it is well for her to profit by Mrs. Carbaugh's experience and try Lydia E. Pinkham's Vegetable Compound. It has restored multitudes of women suffering from just such ailments.

A Column of News and Timely Topics for the Man Who Feeds the World

VELVET BEANS MAKE GOOD GRAZING CROP

Excellent for Cattle and Hogs in Fall and Winter.

Usual Period for Pasturing Is About Three Months but This May Be Lengthened or Shortened as Deemed Advisable.

Velvet beans are an important grazing crop for cattle and hogs in the South in autumn and winter, according to specialists of the United States Department of Agriculture. They are not grazed well by horses or mules, or by any live stock until after they are well matured or frosted. As the leaves, vines and pods decay but slowly when subjected to weather conditions, velvet beans will furnish feed until early spring. It is usually better to let the crop stand until it is well matured, or until it is killed by frost, as the leaves will be off the plants at that time and the corn which has been planted at the same time may be gathered with less difficulty.

The amount of grazing which will be afforded will, of course, vary with the growth of the crop and the quantity of corn not gathered, but it is the custom with many cattlemen to allow one-third to one-half acre a month for each steer or cow. The usual period for pasturing velvet beans is about three months, but this may be shortened or lengthened as deemed advisable. When the period is longer because of large acreage in proportion to the number of cattle there is necessarily some loss of feed through decay.

Hogs should be permitted to follow the cattle, as they will consume practically all the beans which the cattle fail to get. A common practice is to allow one or two hogs in addition to the cattle for each acre of beans. A good stand of velvet beans should produce about 150 pounds of beef and 100 pounds of pork an acre.

QUALITY IS URGENT FACTOR

Striking Example Furnished by Kentuckian, Who Markets Eggs, Poultry and Fruit.

An example of the part that quality plays in a business of direct marketing of farm produce is furnished by the experience of a man in Kentucky who markets eggs, dressed poultry, meats and fruits to consumers in Nashville, Tenn.

The business was established over two years ago by obtaining a friend as the first customer. From this modest beginning the producer has obtained sufficient customers to buy all of the high-grade produce he can supply. Most of the shipments are made by parcel post.

A CORRECTION

The driver of the Independent Oil Company's truck from which truck the gasoline escaped at the time of the fire in the Halford Ogden garage, has requested a correction of the story told at the time of the fire, to the effect that it was thought the tank was empty when the truck was taken into the garage for repairs.

Instead of being empty the tank contained fifteen gallons of gas which was left therein at Mr. Ogden's request and for his use, and not negligently or carelessly.

DUBOIS DOWNED NEW BETHLEHEM

Showing old time form the Dubois High School basketball five defeated the New Bethlehem high school team last evening in the high school gym by the score of 44-29. Although the score would indicate a fast and exciting game it was not so, as it was very slow but nevertheless it was somewhat interesting from the Dubois standpoint as it was the first game they have won in the N. W. P. I. A. L. this year.

PUNXSU WINS FROM REYNOLDSVILLE

The Punxsu team journeyed to Reynoldsville last evening and defeated the high school team at that place by the score of 33-29 in a game that would rival the game at Brookville for closeness.

HOW THEY STAND

The official standing of the W. P. A. L. following the games last evening's games is as follows:

Punxsu	4	0	1,000
Clearfield	3	1	750
Brookville	3	1	750
Dubois	1	3	250
New Bethlehem	1	3	250
Reynoldsville	0	4	000

IT'S GOOD FOR CHILDREN

Mrs. C. E. Schwab, 1007 Fourteenth street, Canton, O., writes: "We use Foley's Honey and Tar for coughs and find it one of the best remedies on the market, especially for children's coughs, as it does not contain any drug that is harmful." Serious sickness often follows lingering colds. Hard coughing racks a child's body and disturbs strength-giving sleep, and the poisons weaken the system so that disease cannot be warded off. Take Foley's in the —Adv

Print Paper and Alcohol

[National Crop Improvement Service.]

WHERE is the genius which will make it possible for every farmer to produce his own power from farm wastes?

Where is the dreamer who will provide print paper at a reasonable price from vegetation which is allowed to rot after having been produced?

Both of these ideas have been practically proven. We know that there is alcohol in the corn stalks," says Mr. Frank Baackes, vice president American Steel and Wire company, "and we

know that we can produce paper from the pulp which is left.

"Now the question is how are we going to accumulate and concentrate enough produce to make such a process economical and practical? Good roads will help.

"Our quality supply must be augmented by a readily available substitute. Our spruce trees cannot last forever. It is high time therefore that we begin to plan the future of both of these great subjects, power and print paper."
